SUMMARY

Passionate Software Engineer, Data scientist, and Machine Learning Engineer/Researcher with expertise in **Python, JavaScript/TypeScript, Rust, Dart, SQL, NoSQL (MongoDB, Neo4j, and Redis)**, alongside hands-on experience with frameworks such as **FastAPI, React.js, Salvo, Nest.js, Flutter, Dioxus**, and **AI/ML** stack. Proven ability to deliver optimized solutions, troubleshoot complex issues, and contribute to **Agile** teams. Strong understanding of version control with **Git**, **DevOps** practices, **CI/CD** pipelines, and **cloud technologies**.

WORK EXPERIENCE

• Hoozon Sarl

Feb. 2024 - Sep. 2024

Full Stack Engineer

Douala, Cameroon

- Engineered middleware in Flask (Python) to automate payment event processing between WordPress(via webhooks) and Node.js, streamlining client workflows.
- Oversaw Docker-based deployments to both development and production, ensuring robust, scalable, and maintainable environments.
- Translate business needs into functional and technical specifications for multi-development software projects.
- Developed mobile features using Flutter and BLoC, delivering seamless cross-platform user experiences.
- Implemented CI/CD pipelines, accelerating release cycles, and improving deployment reliability.
- Contribute to developing the frontend for multi-application using React, TypeScript, and Tailwind CSS.
- Support a team of five developers daily during their tasks.
- **Tech Used:** Flask, React(TS), TypeScript, SQLAlchemy, Redis, RabbitMQ, Celery, Docker, GitHub, WordPress, Yup (form Validation), Tailwind CSS, Nginx, Docker Compose, JavaScript, Python3, webhooks, Vite, TLS/SSL, Shell/bash, Flutter.

• Data Touch Analytics

Dec. 2023 - Sep. 2024

Software Developer

Douala, Cameroon

- Developed end-to-end application for hospital blood donation management, automating data collection and distribution workflows.
- Orchestrated Celery, Redis, and RabbitMQ integration to automate donor notifications(hemovigilance messages to donors after 24 hours, 48 hours (after their samples), and on the date of their next eligible donation), improving engagement and compliance rates.
- Built RESTful APIs in Python, enabling secure, scalable data exchange between hospital systems.
- Create a monthly PDF report generator using Celery Beat.
- Implement a system to send birthday messages to donors.
- Oversee the deployment of applications to development and production environments.
- Leveraged Git/GitHub workflows to enforce code quality and streamline team collaboration.
- Utilized React and TypeScript for responsive frontend interfaces, enhancing user experience for medical staff.
- **Tech Used:** FastAPI, React(TS), TypeScript, PostgreSQL, SQLAlchemy, Redis, RabbitMQ, Celery, Flower, Docker, GitHub, REST, Yup (form Validation), Tailwind CSS, Nginx, Docker Compose, JavaScript, Python3, Celery-beat, Vite, TLS/SSL, Shell/bash.

• Scale AI

Jun. 2024 - Sep. 2024

Artificial Intelligence Trainer

Remote, Douala, Cameroon

- Training AI Systems and Large Language Models (LLMs).
- Enhancing chatbots to be more useful for people worldwide.
- Have an impact in making LLMs safer, accurate, and reliable.
- Help improve the AI chatbot for their customers, and these tasks will directly affect the quality of the chatbot experience environments.
- **Tech Used:** Prompt Engineering, Prompt Writing, Creative Ideas and Thinking, Prompt Evaluation

• Astor Digitech

Feb. 2022 - Jun. 2022

Graduate Internship Engineer

Douala, Cameroon

- Designed and deployed mobile RF drive-testing app, collecting and processing field data for network optimization.
- Developed RESTful APIs with FastAPI and Docker, enabling scalable, containerized data ingestion pipelines.
- Implemented MongoDB and SQLite for efficient, reliable data storage and retrieval.

- **Tech Used:** FastAPI, MongoDB, REST, Docker, Heroku, Flutter, Reactive programming(Dart), SQLite.
- **Astor Protect**  Jul. 2021 - Aug. 2021
Douala, Cameroon
Information Technology Trainee
 - Conducted research and deployed an IaaS (DevStack) on a virtual machine.
 - Analyze multiple development projects.
 - Monitor and manage project progress.
 - Research and deploy the open-source identity and access management solution (Keycloak) on a Kubernetes cluster.
 - **Tech Used:** Keycloak, DevStack (OpenStack), Kubernetes, VirtualBox, UML, Project Management, and Analysis.
- **Flysoft Engineering**  Jul. 2020 - Aug. 2020
Yaounde, Cameroon
Software Development Engineer Intern
 - Develop websites using HTML5, CSS3, and JavaScript.
 - Analyze various development projects.
 - Model a project using UML.
 - Learn reactive programming in Dart, along with Bloc state management.
 - **Tech Used:** UML, HTML5/CSS3, Dart, JavaScript, Reactive programming (Dart), Flutter

SELECTED PROJECTS

- **Oxigraph Web** Mar. 2026 - Now
Tools: Rust, Salvo(Rust), HTML5, JavaScript, CSS3, Docker, Git 
 - A high-performance async REST API built with Rust and Salvo, exposing SPARQL query/update support, RDF import/export (Turtle, N-Triples, RDF/XML), named graph management, interactive dashboard, and OpenAPI/Swagger documentation on top of the Oxigraph RDF/SPARQL store for scalable semantic web applications.
- **Pdf2image Web** Nov. 2025
Tools: Rust, Salvo(Rust), React, Typescript, Ant Design, Docker, Git 
 - A web application that converts PDF files into images and lets users download the results as a ZIP archive.
- **Pdf2image CLI** Sep. 2025
Tools: Rust, Git 
 - A fast and lightweight **command-line tool** to convert PDF pages into high-quality images. Perfect for automation, batch processing, and backend pipelines.
- **FastAPI Crons Dashboard** Sep. 2025
Tools: React, Typescript, And Design, FastAPI, Python, Docker, Git 
 - A real-time, standalone dashboard built for the **fastapi_crons** package - designed to monitor, visualize, and manage scheduled tasks with ease.
- **RMQTT Dashboard** Jun. 2024 - Now
Tools: React, Typescript, And Design, Rust, Salvo(Rust), Docker, Git 
 - Developed a real-time standalone web dashboard to display and visualize resources from the RMQTT Broker server using React with TypeScript.
 - Implemented the dashboard as a plugin for RMQTT and bundled it with the main program for release, utilizing the Salvo framework as the web container.
- **SignMe** Jul. 2023 - Now
Tools: FastAPI, Python, Cryptography, Docker, Git 
 - Developed a back-end application for the Digital Signature Application.
 - Developed user service.
 - Developed signature service.
 - Developed verification service.
- **Simparx** Dec. 2022 - Jan. 2023
Tools: OpenCV, Scikit-image, Image Processing, Git 
 - This method offers a basic approach to paragraph recognition through the use of morphological operations. However, it is important to note that it does not efficiently handle complex image structures.
 - The use of morphological operations can lead to instability when dealing with such complexities. To address this limitation, we plan to employ masks and integrate artificial intelligence, specifically deep learning, to enhance paragraph recognition in complex images.
- **Pdfdrive** Aug. - Sep. 2023
Tools: Scrapy, BeautifulSoup, GitHub Action, Docker, MongoDB, Redis, Git 
 - It's a web scraper that gathers information from the pdfdrive.com website and saves it in a file (JSONL) as well as in a MongoDB database.

- **MongoDB School** Apr. 2021
Tools: MongoDB, Shell/bash, JavaScript, Git 
◦ This school project aimed to develop a series of complex MongoDB queries to meet the student management needs in a university environment.
- **XML Project** Apr. 2021
Tools: XML, XSLT, XSL-FO, Shell/bash, Git 
◦ This school project aims to generate PDF receipts for university fee payments for students from an XML file using XSL-FO and XSLT.

SKILLS

- **Programming Languages:** Python, TypeScript, Rust, Dart, shell/bash, R, $\LaTeX$
- **Web Technologies:** FastAPI, React.js, , Salvo(Rust), Flutter, Dioxus, Express.js, Nest.js
- **Database Systems:** PostgreSQL, MongoDB, Neo4j, Redis, SQLite, Ontotext GraphDB, Apache Cassandra
- **Message Brokers:** RabbitMQ, Apache Kafka
- **AI/ML :** Numpy, Pandas, Matplotlib, Scikit-Learn, Scikit-Image, Seaborn, Apache Spark, Pytorch
- **DevOps & Version Control:** Docker, Kubernetes, Jenkins, Git, GitHub Action
- **Routing & Switching:** Advanced TCP/IP, RIP, OSPF, BGP, Is-Is, MPLS, MPLS-TE, L2VPN, L3VPN, IPV6, IPSec, MQTT, IoT, SDN

EDUCATION

- **École Normale Supérieure d'Enseignement Technique (ENSET) de Douala** Apr. 2026 - Jun. 2027
M.Tech. in Computer Science for Industries Douala, Cameroon
◦ Graduate with Excellence
◦ Expected Master Thesis: A Framework for Evaluating the Performance of Mobile Network Operators
- **African Institute for Mathematical Sciences (AIMS) Rwanda** Sep. 2024 - Jun. 2025
M.Sc. in Mathematical Sciences (Data Sciences) Kigali, Rwanda
◦ Graduate with Distinction
◦ Master Thesis: Computer Vision for Multi-Category African Plum (Safou) Defect Detection
◦ Advisor: Dr. Arnaud Nguembang Fadja
- **École Nationale Supérieure Polytechnique de Maroua (ENSPM)** Sep. 2017 - Jul. 2022
M.Eng. in Computer Networking and Telecommunications Maroua, Cameroon
◦ Graduate with high honors
◦ Master Thesis: Conception et Réalisation d'une Plateforme de Drive Test basée sur une Application Android
◦ Advisor: Dr. BOUDJOU TCHAPGNOUO Hortense

LEADERSHIP EXPERIENCE

- **Co-Leader of IT Club** Oct. 2024 - Jun. 2025
African Institute for Mathematical Sciences (AIMS) Rwanda 
◦ Co-organize workshop to help other students become familiar with coding/programming and technology tools
◦ Co-organize workshops, coding sessions, and events to improve skills and encourage lifelong learning.

HONORS AND AWARDS

- **Mastercard Foundation Scholar** Sep. 2024 - Jun. 2025
African Institute for Mathematical Sciences (AIMS) Rwanda 
- **Prime Of Excellence Of The President Of The Republic** 2018 - 2022
University of Maroua, École Nationale Supérieure Polytechnique de Maroua 
- **Certificate of Excellence for the Baccalaureate (C Series)** Sep. 2017
SIANTOU WANTOU Lucien 

VOLUNTEER EXPERIENCE

- **Technical Content Writer** Nov. 2023 - Sep. 2024
IREX - Institut du Retour d'Expérience 
 - I have contributed to various technical projects. I have written blog posts on topics such as reducing background noise using Audacity and managing swap memory in Linux systems, demonstrating my practical expertise in software tools and system optimization
- **Open Source Developer** Jul. 2021
osscameroon 
 - I have made open-source contributions to develop the website for this organization using React with Typescript.
- **Web Developer** May. 2020
Polyvalent Corporation 
 - Development of the Polyvalent Corporation website—initially using [WordPress](#), then rebuilt with React. Polyvalent Corporation is a preparatory center for top-tier universities in Cameroon: polycorp.netlify.app

TEACHING EXPERIENCE

- **Computer Science Teacher Intern** 04 May. - 23 May. 2026
Lycée Bilingue du Génie Militaire 
 - Supervision of mock exams and in-class grade reports
 - Grading/marking of mock exam papers
 - Assist the lead professor in delivering lectures and directing coursework
- **Mathematics Tutor** Jan. 2020
École Nationale Supérieure Polytechnique de Maroua 
 - I assigned practical work in **Numerical Analysis 1** to 2nd-year students at the Department of Basic Scientific Education (ESB) using Scilab under the supervision of Dr. Guiem Richard.
- **Mathematics & Physics Tutor** Jun. 2019 - Aug. 2019
Polyvalent Corporation 
 - I offered support courses in **mathematics** and **physics** at this center to assist students in preparing for entrance exams to top-tier universities in Cameroon.

CERTIFICATIONS

- **Machine learning in Python with scikit-learn | France Université Numerique** May. 2026
- **Back End Development and APIs | FreeCodeCamp** May. 2024
- **SQL (Intermediate) Certificate | Hackerrank** Aug. 2023

ADDITIONAL INFORMATION

Languages: French (Native), English (C1), Nufi (Native)

Interests: Science, Technology, Research, Industry, Open Source
